Subject: Update on one of Dimock visits

Shawn will be sending an email to Sussman and Mathy noting that the Sautner's, one of the residents, wants to videotape their visit by ATSDR and EPA, it is a public setting, so they can do this, although we expect the video will make u-tube. The Region will use our existing Q's and A's to respond and if something comes up that we haven't messaged, we will note we will need to get back to them, since it will likely require consulting with EPA scientists.
